

## **2020 MotherNatureFestival.live**

### **Oswego, New York Chapter, Mission Statement**

With your own eyes you are seeing, with your ears you are hearing, that all over the world water is either drying up inland or rising on the coast lines. This is just one of many effects of Global Warming that we are facing. Global Warming is the gradual increase in the overall temperature of the earth's atmosphere generally attributed to the greenhouse effect caused by increased levels of carbon dioxide, chlorofluorocarbons, and other pollutants.

The changing of our Climate, because of Global Warming, is the reason behind both the rising Sea Level, the dynamic changes in storm patterns, rise of the average temperature throughout the world and the new, extreme drought patterns.

We of the Oswego, New York chapter of Mothernaturefestival.live are dedicated to doing whatever we can to help reverse the changing of our Climate and stop Global Warming.

We are going to bring together and utilize the potential of each and every entity that will join with us, whether it is an individual or group initiative. We will take personal action, within the daily activities of our individualized efforts to help, or join others in groups or associations to help or contribute financially; all are positive steps to achieve our mission.

We of the Oswego, New York Chapter of Mother Nature Festival, have chosen the Great Lakes as one of our first priorities in our mission. We believe that the Great Lakes will be vital to the future of both the United States and Canada. Another goal is to bring together everyone who sees the urgent need of stopping Global Warming who wants to contribute in some way. By utilizing the combined knowledge of all of us, who are inspired to join in this worthwhile mission, we will be able to give aid where we can do the most good.
